SMITH &
WESSON
1981

QUALITY, PERFORMANCE AND VALUE.

Old fashioned virtues? Perhaps. But three virtues that are sought after by cost-conscious people today. Especially discriminating, cost-conscious outdoor sportsmen and sportswomen.

Products are carefully examined for the combination of materials, skill and craftsmanship that typify the quality of a dedicated manufacturer.

Performance is evaluated in terms of reliability, consistency and long life.

And, when that unique blend of quality and performance comes together in products that are offered at a fair price, the buyer has discovered value.

You'll find all three, quality, performance and value, in the wide range of products Smith & Wesson is offering in 1981.

You'll find quality, performance and value in long guns. From the superb Model 1500 bolt action rifles to the outstanding, proven Model 1000 autoloader and 3000 pump shotgun line.

You'll find quality, performance and value in the world's most sought after handguns. In handcrafted holsters, belts and accessories. In accurate, powerful ammunition.

And in a dozen innovative new knife designs. All designed and manufactured by Smith & Wesson. In Springfield, Massachusetts. Lillington, North Carolina. Rock Creek, Ohio. And Houlton, Maine.

Smith & Wesson wishes to express its appreciation to Clapp & Treat of West Hartford, Connecticut for assistance in selecting and providing the fine shooting apparel and accessories in this catalog.

MODEL 1500 RIFLES

There's a feeling about a fine rifle. More than just the feeling of steel and wood. It's a feeling of natural balance. A feeling of easy, positive pointability. A feeling that this particular rifle will be a companion you can count on. Hunt after hunt. Year after year.

It's the feeling you'll get when you pick up a Model 1500. Wood and metal blend together in a functional expression of traditional rifle quality and styling. The design and performance characteristics preferred by the most demanding and experienced shooters are integrated in these straight shooting rifles of highest quality material and workmanship.

For example, the conveniently located thumb safety securely locks the trigger but allows the bolt to be opened for quick, safe inspection and unloading.

The lustrous blue metal finish and the hand-rubbed smoothness of select American walnut give Model 1500 rifles the look and feeling of far more expensive guns.

And close inspection will show these fine rifles are built to the exacting specifications and quality standards that promise the many years of performance and accuracy expected of a Smith & Wesson.

ACTION AND RECEIVER

Model 1500 rifles are offered in two action lengths. The short action, coupled with a 22-inch barrel, available in 243 Win., is ideal for medium game and varmint shooting. The long action, in 25-06 Rem., 270 Win., 30-06, 7mm Rem. Magnum and 300 Win. Magnum, tailors the Model 1500 for large game hunting.

Twin locking lugs ride in a three rail design for smooth, easy, non-binding bolt operation and travel. The bolt body has three relief ports to allow gas to escape downward through the magazine box in the unlikely event of a cartridge case rupture.

Receivers are machined from a single piece of forged steel for maximum strength. And all Model 1500 receivers are drilled and tapped for conventional scope mounts.

TRIGGER GROUP

The Model 1500 has the crisp let-off with minimum overtravel that you'd expect to find on a target rifle. That's part of the unique Smith & Wesson design that incorporates trigger guard and magazine box in a single unit. A hinged floorplate, with the release slotted into the front of the trigger guard, makes unloading safe, fast and simple.

STOCK

Model 1500 stock styling follows the modern preference for straighter stocks with less drop at the heel. The result is faster, more consistent eye and sight alignment and, most important, a straighter recoil for minimum muzzle jump.

A prominent cheek piece on the high comb of the Deluxe model naturally positions the eye at scope level. The stock on the standard model allows you to cheek down for the open sights yet comfortably positions you for scope shooting, too.

Careful inletting of the stock provides precision bedding of the receiver and barrel to insure consistent accuracy.

And Smith & Wesson's brilliant, durable finish protects and maintains the stability of the wood through season after season of changing weather.

Smith & Wesson Model 1500 bolt action rifles are offered in Deluxe and Standard versions.

MODEL 1500 DELUXE

Skip-line *hand* checkering, a feature of the most expensive custom guns, and the engine turned bolt are the first clues that this rifle offers outstanding value in performance and special design features.

The stock, with its Monte Carlo comb and cheek piece, is crafted from American walnut selected for rich, beautiful grain. A ventilated pad softens the recoil on Magnum models.

The Deluxe comes with swivel posts and quick detachable swivels. And an inlaid Smith & Wesson seal adds the finishing touch to the pistol grip cap.

MODEL 1500

The Standard model of the 1500 rifle is an exceptional value in Smith & Wesson quality and performance. A hooded ramp "gold bead" front sight and a fully adjustable broad vee, round notch rear sight put you on target.

Eighteen line hand checkering provides a sure grip on the hand-filling pistol grip and fore-end. Posts are installed for your favorite swivels and sling. It's a gun you'll be proud to own and take into the field.

SPECIFICATIONS

Action. Repeating bolt action. Twin locking lugs. Two action lengths.

Stock and Fore-end. Select American walnut. Deluxe has Monte Carlo comb and cheek piece, skip-line hand checkering. Standard has eighteen line checkering. Non-slip hard butt plate with white line spacer (ventilated rubber recoil pad on Magnum models). Pistol grip cap with inlaid S&W seal, swivel posts, quick detachable swivels on Deluxe. Swivel posts on Standard.

Stock Dimensions. Deluxe: 13 1/2" length of pull; 1 3/8" drop at heel; 3/4" drop at comb; 1/2" drop at Monte Carlo. Standard: 13 1/2" length of pull; 1 3/8" drop at heel; 3/4" drop at comb.

Receiver. Machined single piece steel. Drilled and tapped for conventional scope mounts.

Hinged steel floor plate with release on outside of trigger guard. Engine turned bolt body on Deluxe.

Sights (Standard only). Hooded ramp front sight with gold bead and fully adjustable rear. Both removable.

Safety. Positive, non-slip, thumb type on right side, locks trigger but allows bolt to be opened for safe inspection and unloading.

MODEL 1000 AUTO LOADING SHOTGUNS

Remember the day you took your first shotgun out of the box? Your eyes feasted on the deep, rich blue finish of the barrel and receiver. Your hands grasped the beautifully finished stock and fore-end.

And that gun swung to your shoulder as naturally as if it were a part of your body.

The Smith & Wesson Model 1000 gas autoloader has been designed and crafted to recapture that special feeling.

The first time you swing a Model 1000 to your shoulder you'll feel the superb balance, the responsiveness of this extraordinary shotgun.

Wood flows into metal. Double sighting beads lead your eyes to the target. Take in the details of this shotgun that is made without compromise.

In quality, performance and value, the Model 1000 is a shotgun that will give you the pride of owning something extraordinary. Today. And for many tomorrows.

THE MODEL 1000 GAS SYSTEM.

Here's the reason the Model 1000 performs when other autoloaders fail. The patented internal gas metering system compensates for pressure differences in ammunition to control bolt velocity and minimize stress on the receiver and action.

When magnum or high velocity loads are fired, the unique pressure compensator moves forward to release excess pressure. Only the pressure required to move the hard chromed steel piston the two inches needed to function the short action bars is channeled through the stainless steel magazine tube. The piston, in addition to serving as a strong, positive gas seal, expels carbon residue with every stroke in a positive, self-cleaning action on the cylinder wall.

The result is improved reliability and performance over old style gas systems. In these systems pressure pushes against metal rings, with a single, fragile "O" ring serving as the gas seal, to drive a weighted sleeve on the outside of the magazine tube to function the action. Added stress is created when the high pressures generated by the firing of magnum or high velocity loads slam the weighted sleeve back against the action and receiver. And, unlike the Model 1000 system, which is sealed from moisture and dirt, these old style systems are exposed to the elements which can cause corrosion and malfunctions.

BOLT AND BOLT CARRIER

The steel locking block in the bolt fits into the barrel extension to provide the strength of a steel on steel lock up. Both bolt and bolt carrier in the Model 1000 are hard chromed steel. They resist rust and corrosion to provide consistent, like-new performance and good looks. Shot after shot. Year after year.

BARRELS

The barrels are premium quality molybdenum steel. Cold hammer forged to length and shape. Then precisely reamed to gauge, polished to near perfect smoothness and choked with exacting skill to insure maximum pattern effectiveness.

WOOD

The stock and fore-end of the Model 1000 are crafted from select American walnut, specially chosen for superior grain. They're hand filled, hand rubbed and finished for lasting durability and beauty. And then extensive hand cut checkering, with sharp raised diamonds, provides the rare combination of aesthetic beauty with the functional demand for a sure, firm grip.

THE GUN MAKER'S ART

The quality of the Model 1000 is evident in every detail. The high luster blue finish. The smooth flowing, matte finish, cross-hatched steel vent rib. The handsome scroll etching on both sides of the receiver. The broad, comfort contoured hard chromed trigger. The right or left hand cross bolt safety.

And the famous Smith & Wesson seal inset into the pistol grip cap. A signature that says we're as proud to offer the Model 1000 as you will be to own one.

MODEL 1000 2¾"

Whether you prefer 12 or 20 gauge, the lightweight, alloy receiver, 2¾" chambered Model 1000 is one of the most versatile shotguns you can find. It's really five guns in one, because interchangeable barrels provide a choice of five chokes and four barrel lengths. Including a 22" slug barrel with rifle sights. That means the Model 1000 owner can enjoy a full range of shooting pleasure, from skeet to white wings to deer.

MODEL 1000 3" MAGNUM

Even with a high strength steel receiver, the Model 1000 3" Magnum weighs in at less than a pound more than its 2¾" cousin. In 12 gauge, the Magnum is available with a 30" barrel in your choice of full or modified choke. The 20 gauge Magnum is available with a 28" barrel in the same chokes.

The 3" chambered barrels supplied with Magnum models are designed only for use with 2¾" magnum or 3" magnum shells.

Magnum models will also accept 2¾" chambered barrels of the same gauge to allow use of any 2¾" shell including light skeet or field loads. Barrels chambered for 3" magnum loads may not be used on the 2¾" Model 1000 receiver.

SPECIFICATIONS

Style. Gas-operated low-recoil autoloading shotgun.

Gauges. 12 gauge 2¾" and 3" Magnum, 20 gauge 2¾" and 3" Magnum.

Barrel. Smith & Wesson proof-tested chrome molybdenum steel. Extra barrels interchangeable without fitting.*

Receiver. Lightweight, high tensile strength aluminum alloy, scroll engraved both sides. 3" Magnum has steel receiver.

Safety. Positive cross-bolt type, interchangeable left or right hand.

Sights. Two metal beads on vent rib. 22" cylinder bore barrel has rifle sights.

Stock & Fore-end. Select American walnut. Rubber recoil pad on Magnum models and slug guns.

Standard Stock Dimensions. Length of pull 14", drop at comb 1½", drop at heel 2⅜".

Length. 48" overall with 28" barrel.

Approx. Weight. 7½ lbs. with 28" barrel (12 gauge, 2¾" chamber); 6½ lbs. with 28" barrel (20 gauge, 2¾" chamber); 8 lbs. with 30" barrel (12 gauge, 3" chamber); 7 lbs. with 28" barrel (20 gauge, 3" chamber).

THE SUPER SKEET

One look is all you'll need to see that the SuperSkeet is a very special member of the Model 1000 family. It has been designed and manufactured with unique features that put it in a class by itself.

As soon as you pick up the Model 1000S SuperSkeet you'll feel the difference. The right hand palm swell positions your hand and trigger finger perfectly.

The special hand-fitted and tuned trigger has been contoured asymmetrically, rounded on the right side, to give you maximum comfort and control of the crisp trigger pull. The "cast-off" stock is precisely angled to the right to provide fast, positive eye alignment as the gun is being shouldered.

A couple of swings is all it takes to sense the perfect balance and weight distribution. One and two ounce swing compensating weight caps are included to permit the shooter to tailor the balance to his individual shooting style.

As you sight down the barrel you'll find the mid point bead on the wide, matte-finished vent rib and a "Bright Point" light gathering, fluorescent red front sight. And a center track that leads you right to the target.

The barrel of the SuperSkeet is unique, too. A special recessed skeet choke provides more uniform distribution of the shot within the pattern. You can see the difference on your own pattern board and experience it in your skeet scores.

Fifteen special muzzle vents, five on each side and five on the bottom, soften recoil and reduce muzzle jump to help you get to that double fast.

Any $2^{3}/_{4}$" chambered barrel may also be used with the SuperSkeet, giving the competitive shooter the added versatility of a premium quality field gun.

Of course, the Model 1000S SuperSkeet incorporates all the proven features of the proven Model 1000 autoloader design. The same unique, self-cleaning and pressure compensating gas system. The same meticulous attention to quality in every detail. And fancy grade select American walnut, hand sanded, hand filled and protected with coat after coat of fine lacquer.

SPECIFICATIONS

Action. Autoloading, light recoil gas operation.

Gauge. 12, $2^{3}/_{4}$" chamber.

Receiver. Steel, contoured to reduce obstruction for trigger finger. Scroll engraved both sides.

Stock and Foreend. Selected American walnut, hand checkered in a deluxe pattern, right hand palm swell. Pistol grip cap with inset S&W seal. Non-slip hard butt plate with white line spacer.

Stock Dimensions. 14" length of pull; 1.5" drop at comb; 2.5" drop at heel; 2.2" pitch down; .08" cast off at butt; .16" cast off at toe.

Barrel. 25" with wide, center track ventilated rib. Midpoint sighting bead and "Bright Point" light-gathering fluorescent red front sight.

Choke. Special recessed skeet.

Trigger. Asymmetrical, rounded on right, with 2.4–3.1 pound, crisp pull.

Swing Compensators. 1 and 2 ounce weights, with locking bolt and wrench included.

Muzzle and Recoil Compensators. 10 lateral vents and 5 bottom vents.

Weight. Approx. $8^{1}/_{4}$ lbs.

Length Overall. 45.7".

Safety. Cross bolt, interchangeable left and right.

MODEL 3000 PUMP SHOTGUNS

Many American scattergunners were weaned on a pump shotgun. And the pump action is still a favorite.

But you'll agree that a new dimension has been added when you pick up a Model 3000* pump. First thing you'll notice is the perfect partnership of weight and balance. It feels right. Swings easy. And points naturally.

Try the action. Dual action bars provide fast, straight-line pumping. Smooth feeding. Positive ejection. It feels the way you've always wanted a pump action to feel.

Run your hands over this engineering masterpiece. Feel the warmth of the richly grained American walnut. See how perfectly the wood mates with the deep blue receiver and barrel. Feel the sure-grip security of the deep hand checkering.

Some gun, this Model 3000 pump. Designed and built with pride to exacting quality standards to help the value conscious shooter enjoy year after year of dependable performance. Now you don't have to buy two shotguns to shoot 3" or 2¾" loads. Model 3000 pump shotguns are chambered for 3" Magnum loads. They'll handle any 2¾" load as well to provide maximum shooting versatility and enjoyment.

Behind the superb lines, functional beauty and natural feel of the Model 3000 pump is solid design and manufacturing engineering.

RECEIVER AND BOLT

Each Model 3000 pump starts with a receiver that's machined from solid steel made to demanding Smith & Wesson specifications. The bolt is chromed and polished to resist corrosion and provide years of like-new performance.

Operating elements in the bolt have been designed to provide positive shell extraction and smooth feeding. And dual action bars insure smooth, easy, non-binding, straight-line pumping action.

BARRELS

Model 3000 pump barrels are cold hammer forged from molybdenum steel to stand up for a lifetime of hunting seasons. Then they're precisely reamed to gauge, polished to near perfect smoothness and choked with exacting skill for optimum pattern effectiveness.

***Model 3000 pump shotguns were originally introduced as the Model 1000P. The model number has been changed to avoid confusion with the popular Model 1000 autoloader. All features and specifications remain the same whether the gun is marked Model 1000P or Model 3000.**

WOOD

Both stock and fore-end are fashioned from selected American walnut, specially chosen for deep, rich color and grain. Extensive hand checkering adds to the beauty of the pistol grip and fore-end. Then they're hand rubbed and finished for lustrous, long-lasting beauty.

The cross-bolt safety is reversible, of course. A rubber recoil pad is standard. And the distinctive Smith & Wesson seal is set into the pistol grip cap. Our way of saying we're proud of the quality, performance and value we've built into the Model 3000 pump.

SPECIFICATIONS

Style. Pump action shotgun with dual action bars.

Gauge. 12 gauge chambered to accept both 2 3/4" and 3" magnum shells.

Barrel. Smith & Wesson proof-tested chrome molybdenum steel. Barrels interchangeable without fitting.

Receiver. Machined steel.

Safety. Positive cross bolt, interchangeable right or left hand.

Sights. Single front bead.

Stock & Fore-end. Select American walnut, extensively hand checkered.

Standard Stock Dimensions. Length of pull 14", drop at comb 1 3/8", drop at heel 2 1/4".

Length. 48 1/2" overall with 28" barrel.

Approx. Weight. 7 lbs. 7 oz. with 28" barrel.

HANDGUNS

Knowledgeable handgunners will tell you there's something special about a Smith & Wesson handgun. More than just S&W's smooth, fast double action. Acclaimed as the world's smoothest. Or crisp, clean single action. More than just the right combination of weight and balance. And more than perfection in finish.

It's a feeling that you can't find a better handgun.

A feeling that comes from the knowledge that dedicated craftsmen and skilled fitters don't rest until every part mates perfectly in a handgun that functions as only a Smith & Wesson can.

It's attention to details that count. Like case hardened contact areas on hammers and triggers to assure smooth, consistent trigger pull for the life of the gun. A forward extractor rod locking bolt and rear cylinder stop work in conjunction to maintain positive alignment between cylinder and barrel. And a cylinder release thumb piece that moves forward for easy, single hand operation.

Smith & Wesson revolvers are built on three frame sizes. Each frame, including the top strap and grip areas, is machined from a single, strong forging.

Revolvers built on the J frame, S&W's smallest, are unique among small frame guns in their ability to stay in time. Cylinder charge holes always line up properly with the barrel in these lightweight, compact, easy to carry handguns.

A wide range of calibers, in a variety of barrel lengths are built on the versatile medium size K frame. K frame revolvers provide an unmatched variety of hammers, sights and trigger styles, too.

N frame revolvers, built on S&W's largest frame, are favorites for handgun hunting, metallic silhouette and other competitive shooting. Again the shooter is offered unmatched versatility in stocks, trigger styles and hammers as well as a wide range of calibers.

Smith & Wesson also offers a line of semiautomatic pistols to meet the needs of competitive shooters and sportsmen, including the reliable, accurate Models 439, 459, 539 and 559 in 9mm. The Model 41 and Model 52 are among the most accurate out-of-the-box target pistols available.

Engraving, each a unique, original work of art, is available to enhance the beauty and value of any Smith & Wesson handgun. Skilled S&W engravers painstakingly execute distinctive designs providing your choice of full (Class A), ⅔ (Class B) or ⅓ (Class C) coverage. In addition, virtually any type of custom design, from initials to replicas of seals or emblems to inlaying of silver, gold or platinum, can be provided.

You'll find the handgun you want to meet your specific needs in the Smith & Wesson line – the broadest line on the market.

.22 & .38 CALIBER

.22 CALIBER

Model 17, the K-22 Masterpiece, in .22 Long Rifle, is a six-shot, serious target shooter's revolver built on the medium size K frame. The front sight is a 1/8" plain Patridge, the rear is S&W micrometer click sight, adjustable for windage and elevation. The Model 17 is available with 6" or 8 3/8" barrel, comes with checked walnut service stocks and is finished in S&W blue.

Model 18, the .22 Combat Masterpiece, in .22 Long Rifle, is a six-shot, K frame revolver. It combines the economy of shooting .22 ammunition with the weight and feel of a .38 revolver. The front sight is a 1/8" Baughman Quick Draw on a plain ramp, the rear is S&W's micrometer click sight. Model 18 is available with a four inch barrel, checked walnut service stocks and is finished in S&W blue.

Model 34, the world famous 1953 .22/.32 Kit Gun for campers and fishermen, in .22 Long Rifle, is a six-shot revolver built on the smaller J frame. The front sight is a fixed, 1/10" serrated ramp, the rear S&W micrometer click sight. Model 34 is available with two or four inch barrels, checked walnut round or square butt service stocks and finished in either S&W blue or nickel.

Model 48, the K-22 Masterpiece, M.R.F., in .22 Magnum Rim Fire, is a six-shot, K frame revolver that's ideal for small game hunting. Available with 4", 6" or 8 3/8" barrels. The rear sight is S&W's micrometer click sight. Stocks are checked walnut service. The finish is S&W blue. And an auxiliary cylinder in .22 Long Rifle is available.

Model 41, the renowned .22 target autoloading pistol, in .22 Long Rifle, has a 10 round magazine. It's available with a 7" barrel with a 1/8" Patridge undercut front sight and an S&W micrometer click sight on the rear. The 5 1/2" heavy barrel version has a 1/8" Patridge undercut on a ramp base front sight and an S&W micrometer click sight with a wide sight slide on the rear. Stocks are checked walnut with a modified thumb rest equally adaptable for right or left hand shooters. The grooved 3/8" wide trigger has an adjustable stop. And the finish is S&W bright blue.

Model 63 is the stainless steel version of the Model 34 Kit Gun. It's only available with a four-inch barrel and a square butt. Other specifications remain the same.

.38 CALIBER

Model 14, the K-38 Masterpiece, in .38 S&W Special, is a target shooter's favorite. This six-shot revolver is built on the medium size K frame. The front sight is a 1/8" plain Patridge, the rear is S&W's micrometer click sight. Model 14 is available with a 6" or 8 3/8" barrel, has checked walnut service stocks and is finished in S&W blue.

Model 15, the Combat Masterpiece, in .38 S&W Special, is a six-shot K frame revolver. Front sight is a 1/8" Baughman Quick Draw on a plain ramp, the rear S&W's micrometer click sight. Available with 2" or 4" barrel, the Model 15 has checked walnut service stocks and is finished in either S&W blue or nickel.

Model 36, Chiefs Special, in .38 S&W Special, is a five-shot revolver built on the small J frame. Probably the world's most popular small frame handgun for off-duty police officers, Model 36 is available with a 2" or 3" barrel, has a fixed 1/10" serrated ramp front sight and a square notch rear sight. It has checked walnut, round or square butt service stocks and is finished in either S&W blue or nickel.

Model 52, the .38 Master, is a single action, semiautomatic target pistol designed specifically to fire .38 S&W Special mid-range wadcutters from its five round magazines. Barrel length is 5". The front sight is a 1/8" Patridge on a ramp base, the rear S&W micrometer click sight with a wide sight slide. Grips are checked walnut, the grooved trigger is 3/8" wide with an adjustable trigger stop, and the finish is S&W bright blue with sandblast stippling around the sighting areas to break up light reflection.

Model 60 is the stainless steel version of the famous Model 36 Chiefs Special. It's available only with a 2" barrel. All other specifications remain the same.

Model 67 is the stainless steel version of the Model 15 Combat Masterpiece. Available only with a four-inch barrel, its front sight is 1/8" S&W Red Ramp on a ramp base, the rear is S&W micrometer click sight in black stainless steel. Stocks are checked walnut service with square butt.

9MM

Model 439 is an alloy frame, eight-round autoloading pistol designed for 9mm Luger and Parabellum loads. It features a new "dogleg" extractor system for a strong positive pull and sure extraction. The front sight is a 1/8" serrated ramp, the protected rear sight is a square notch with micrometer click adjustment for windage and elevation. Stocks are checked walnut and the Model 439 is available in either S&W blue or nickel.

Model 459 is a 14-round version of Model 439. It has the same superior extractor system, the same new adjustable rear sight, the same front sight as Model 439. Stocks are checked high-impact molded nylon and the gun is available in S&W blue or nickel.

Model 539 is a steel frame version of the Model 439 eight-round autoloading pistol. All other specifications remain the same.

Model 559 is the steel frame version of the Model 459 14-round autoloading pistol. All other specifications remain the same.

.357

Model 19, the .357 Combat Magnum, is a six-shot, .357 Magnum revolver built on S&W's medium size K frame. It's available with 2 1/2", 4" and 6" barrels with a 1/8" Baughman Quick Draw front sight on the 2 1/2" and 4" barrel versions and a 1/8" Patridge on the 6" model, ideal for a hunting handgun. All have S&W micrometer click stop rear sights. Stocks are checked Goncalo Alves with a speed loader cut for the 4" and 6" versions, and checked walnut round butt service stocks for the 2 1/2" model. Finish may be either S&W bright blue or nickel.

Model 27 is a six-shot, .357 Magnum revolver built on S&W's large N frame to absorb the energy of high velocity hunting loads. A choice of 2 1/8" S&W Red Ramp or 1/8" plain Patridge is available as a front sight, the rear is an S&W micrometer click sight. Model 27 is available with 4", 6" or 8 3/8" barrels, has checked Goncalo Alves target stocks and finished in either S&W bright blue or nickel with a finely checked top strap and barrel rib. An optional presentation case is available.

Model 28, the .357 Highway Patrolman, is a six-shot, N frame, .357 Magnum revolver. Front sight is a 1/8" Baughman Quick Draw on a plain ramp, and the rear is an S&W micrometer click sight. Model 28 is available with 4" or 6" barrels, has checked walnut service stocks and is finished in S&W satin blue with sandblast stippling on the barrel rib and frame edging. Walnut target stocks are available at a slight extra cost.

Model 66 is the stainless steel version of the Model 19 .357 Combat Magnum. Except for its sights, which are an S&W Red Ramp on a ramp base for the front and S&W black stainless steel micrometer click sight on the rear, specifications are the same as for the Model 19.

.41 MAGNUM

Model 57 is a six-shot, .41 Magnum revolver built on the large N frame for hunting and silhouette shooting. The front sight is a 1/8" S&W Red Ramp, the rear S&W's micrometer click sight with a white outline notch. The gun is available with 4", 6" or 8 3/8" barrels, comes with checked Goncalo Alves special oversize target stocks and may be finished in either S&W bright blue or nickel. An S&W wood presentation case is included.

.44 MAGNUM

Model 29, a six-shot, .44 Magnum, N frame revolver, is a favorite of handgun hunters and metallic silhouette shooters. It is available with 4", 6" or 8 3/8" barrels. Front sight is the S&W Red Ramp, rear is S&W's micrometer click sight with a white outline notch. Stocks are special oversize target models of checked Goncalo Alves. Finish may be either S&W bright blue or nickel. A presentation case is included.

Model 629 is the stainless steel version of the Model 29 .44 Magnum. The Model 629 is only available with a 6" barrel. All other specifications are the same as for the Model 29.

.45 CALIBER

Model 25, the 1955 .45 Target model, is a six-shot .45 A.C.P. revolver built on the rugged, large N frame. The front sight is a 1/8" plain Patridge, the rear an S&W micrometer click sight. Model 25 is available with a 6" barrel, and has a checked target type hammer and grooved target type trigger. Checked Goncalo Alves target stocks are standard and the gun is finished in S&W blue. A wood presentation case is included.

Model 25-5, in .45 Colt, is also a six-shot, N frame revolver for those who prefer a heavier hunting load. It is available with 4", 6" or 8 3/8" barrels. Front sight is a 1/8" S&W Red Ramp, the rear an S&W micrometer click sight with a white outline notch. Model 25-5 has a checked target type hammer and a grooved target type trigger and is furnished with checked Goncalo Alves target stocks. Finish is S&W bright blue.

9MM, .357, .41 MAGNUM, .44 MAGNUM, .45 CALIBER

AMMUNITION

It's almost impossible for a shooter to evaluate ammunition performance. You've got to rely on the expertise of the manufacturer. That's why Smith & Wesson specializes in centerfire handgun ammunition.

Our experience with handgun manufacturing and handgun shooting has enabled us to develop an innovative line of handgun ammunition that provides consistently uniform accuracy, power and controlled expansion. Round after round. Box after box.

Each cartridge is a balanced ballistics system. Designed by Smith & Wesson ballistics engineers. Tested in our own modern ballistics laboratory. And manufactured under the strictest quality standards and controls in Smith & Wesson's own ammunition plant.

Recently, in another pioneering development in handgun ammunition design, Smith & Wesson introduced Nyclad ammunition with nylon jacketed bullets. Nyclad ammunition offers unmatched benefits in reduced airborne lead contamination and bore fouling without sacrifice in accuracy and performance.

Whether you're a handgun hunter out for game, or a target shooter looking for that perfect score, you'll find the quality you want in the blue box with the Smith & Wesson name.

CENTERFIRE HANDGUN AMMUNITION

Providing discriminating shooters with the finest in centerfire handgun ammunition takes a combination of the finest components.

That's why we design and manufacture our own primers. Famous S&W Max-Fire primers that insure consistent uniformity of ignition.

We load only premium quality brass cases made to our exacting specifications. And we load them with precise measures of clean, progressive burning, smokeless powder to insure correct muzzle velocity and energy.

The bullet for each Smith & Wesson round is computer designed and proven against rigid requirements for velocity, concentricity and stability. Each bullet meets terminal ballistics parameters for maximum accuracy, desired expansion and remaining weight after penetration. That's why we make different bullets for our .38 and our .357 rounds. And we make those bullets in Smith & Wesson's own bullet factory.

The result is ammunition that consistently combines S&W accuracy with the kind of performance we're proud to detail in the accompanying chart.

NYCLAD AMMUNITION

Here's a breakthrough in ammunition design that provides the velocities and accuracy of jacketed bullets. And the expansion of lead without the problems of lead. In addition, Nyclad ammunition virtually eliminates bore leading, gun fouling and lubricant smoke.

The performance of Nyclad ammunition, with the figures based on firing from actual guns is equal to or better than conventional ammo. Take a look at the new load we call the "Chiefs Special" a .38 Special 125 grain semiwadcutter hollow point round specifically designed for alloy frame and 2-inch revolvers that can't handle +P ammunition. The "Chiefs Special" combines 90 per cent of the muzzle velocity of a +P load with the low pressures and mild recoil of a wadcutter. Its Nyclad bullet provides over .60 caliber expansion that can't be matched by conventional jacketed ammunition at standard velocities and pressures from 2" barrels.

Accuracy is as good or better than conventional ammunition, too.

You get the kind of tight groups you expect from Smith & Wesson.

Nyclad bullets virtually eliminate the bore fouling problems caused by ordinary lead bullets in .38 Special ammunition and reduce fouling at least 75 per cent in .357 Magnum loads. And, since nylon is its own lubricant, the smoke from normally lubricated bullets is virtually eliminated.

Airborne lead contamination, traced primarily to the action of burning powder gases on the base of lead bullets, is a serious health hazard that has caused the shutdown of several indoor ranges. Independent analysis has proven reductions in airborne lead contamination of from 61 to 89 per cent compared with conventional lead bullets.

It takes a shooter to understand the way another shooter feels about leather. Leather to a shooter is more than a select piece of hide, perfectly tanned, molded and sewn into a holster or belt. Leather is more than style, more than rich warm color and heady aroma. Leather is personal. A choice that reflects its owner's individuality.

Smith & Wesson understands. You can see it in the perfect combination of function, comfort and rugged good looks of each Smith & Wesson holster. You can see they are built to fit the gun, hold it firmly in place and reduce wear on the gun's finish. Each holster is designed to position the gun for a smooth, easy draw as well.

We've created and built a wide selection of sporting holsters, belts and accessories to meet every taste and demand. Each is crafted with uncompromising attention to quality and detail.

Only select, top grain cowhide, carefully chosen for strength, consistent thickness and texture, is used. Sewing is done with pride. Hand polishing is done with meticulous care. And every piece gets a long, hard look from inspectors who check every detail.

When your choice is Smith & Wesson leather, your choice is style, comfort and durability in leather you can wear with confidence and pride.

LEATHER

HOLSTERS

Model 02 Off-Duty Holster is a smartly styled, snug fitting holster designed to accommodate most small, medium and large frame revolvers with 2" to 6½" barrels. Model 02 has a single retaining strap and a sight protector. It's available to fit a 1¾" belt in black or russet, plain or basket weave.

The Model 04 High-Ride Holster is a distinctive design that features a breakaway retaining strap, an open trigger guard and a sight protector. Model 04 fits most revolvers with 2" to 6½" barrels. It's available in black or russet, plain or basket weave and is designed for 2¼" belts.

Model 11 Automatic Holster fits most of today's popular medium and large frame automatics. A rugged design, the Model 11 is a high-ride holster with a single retaining strap. For 1¾" belts, it's available in black or russet, plain or basket weave.

Model 21, the Blazer Holster, is one of the most popular holsters ever developed. It is designed to handle all popular single and double action sporting revolvers and automatics with 2" to 8⅜" barrels.

The Blazer has burnished and waxed edges, a trigger guard welt and a snap-on loop for belts up to 3" wide. And it's available in plain black or russet leather.

The Model 22 Lined Holster is a premium quality, fully lined model with a built-in sight protector and a single retaining strap.

The Model 22 will accommodate revolvers and automatics in all frame sizes with barrels from 2" to 8⅜" in length. It's available in black or russet, plain or basket weave.

Model 22 holsters for guns with barrels 4" or longer have a 2¼" belt loop, and a 1¾" belt loop for guns with barrels under 4" in length.

Model 48, our Blazer Western Holster, is an authentic western design for all single action .22, .38 and .44 caliber revolvers.

A flared plate follows the contour of the holster and the holster loop is secured by two heavy snaps.

There's a leather leg tie and a looped thong that goes over the hammer. Teamed up with the Model 118 Blazer Western Belt, the Model 48 holster makes an unbeatable western rig.

Model 27, the new Sportsman Holster, is a dressy, close fitting, high ride holster. Crafted from pre-finished brown leather and lined in soft S&W blue suede, this holster is available in two versions. One accommodates most popular large and medium frame revolvers, the other is designed for medium frame automatics like the Smith & Wesson Model 439 or 459.

Model 29L is our Slimline Holster, that really stays tight and snug against your body. It's lined with a soft S&W blue suede that cushions and protects your gun. Meticulously stitched and molded, the Slimline has concealed belt loops for 1¾" belts, a wide thumb break strap and rides high in the favored "FBI" tilt.

Available in pre-finished brown leather or dip-dyed black leather for 2" to 4" small or medium frame revolvers.

Model 29 is the unlined version of the 29L and is identical to it in every specification except for the suede lining.

Model 49, the High Ride Concealed Thumb-Break Holster, is an innovative S&W design that hides the popular thumb-break behind the grips of the gun. And even though it's protected from accidental bumping or snagging, it's exactly where the thumb will naturally release the retaining strap as the hand moves to draw the gun.

Model 49 has a leather lining, a durable polyurethane thumb-break and a full welt. Available with a 1¾" belt loop for 2" small frame revolvers and a 2¼" belt loop for medium and large frame revolvers with barrels up to 6" in length. In black or russet, plain or basket weave.

Model 28 is our new Ankle Holster, and one of the most comfortable on the market. A padded lining and a high area of the holster extend behind the gun to protect the leg from chafing. There's no hammer strap on the revolver model which means, in addition to the fast, easy draw, the ankle holster will accommodate S&W's popular Bodyguard® model.

An adjustable tab tailors the fit of the holster to the gun. All synthetic, the Model 28 fits 2" revolvers and small automatics. In black only.

Model 43 Shoulder Holster is a fast draw, breakout spring tension design.No metal parts are exposed to the gun. A glove leather shoulder strap and elasticized nylon harness adjust to the wearer's body for maximum comfort. An offset belt strap pulls the gun close to the body. There's a removable belt strap on the opposite side and an adjustable hammer strap for added security. In cordovan, it handles small, medium and large frame revolvers with barrels from 2 to 6½ inches and large frame automatics.

Model 92, the Revolver Cartridge Belt, is the perfect companion for your Smith & Wesson holster. There are 20 loops for either .38 or .357 Magnum ammunition on this beautifully detailed 1¾" wide belt. The Model 92 is available in russet, plain or basket weave in sizes to fit waists from 28" to 50".

Model 94, the Rifle Cartridge Belt, is a rugged, fully lined, good looking belt that tapers from 2¼" to 1¼". It has 20 loops for your favorite cartridges and comes in S&W's rich, warm russet finish.

The Model 94 is available to fit waist sizes from 28" to 50" in either plain or basket weave.

Model 112 is our Blazer Cartridge Belt. Tailored to be the perfect mate for a Model 21 Blazer holster, this fine belt was created to meet the demand for a less expensive 1¾" cartridge belt. Model 112 has 20 raised loops for .22, .38, .357 Magnum or .44 Magnum ammunition. It's available in plain black or russet in sizes to fit waists from 28" to 50".

Model 113, the Blazer Rifle Cartridge Belt, is a smartly styled, unlined beauty crafted in russet finished leather. There are 20 strong loops for your favorite caliber cartridges. Available in sizes to fit waists from 28" to 50", the Model 113 tapers from 2¼" to 1¼" in width.

Model 114 is our Unlined Dress Belt. Fashioned from heavy, top grain cowhide, this smart looking dress belt is 1¾" wide, it's available in russet, either plain or basket weave, in a full range of waist sizes.

The Model 117 Dress Belt was created to complement Smith & Wesson's smaller commemorative buckles like the .357 Magnum. A distinctive decorative design adds to the rugged good looks of this 1½" wide belt. The Model 117 is available in black or brown in a full range of waist sizes.

Model 119 Dress Belt is a 1¾" wide version of the Model 117 designed for use with Smith & Wesson's larger commemorative buckles like "the Hostiles." It is the same in all other details.

Model 118 is the Blazer Western Belt, crafted in the traditional western style. It's 2⅞" wide with a unique scallop design on the buckle and billet ends. There are raised cartridge loops for your choice of .22, .38, .357 Magnum, .44 Magnum or .45 caliber ammunition. Model 118 is available in brown to match the Model 48 Blazer Western Holster in a full range of waist sizes.

Model 131, our new Unlined Belt, is a rugged, good looking, unlined dress belt with the heft to keep the Slimline (or any other holster) tight to your body. It's just 1½" wide to fit those new narrow trouser belt loops. Model 131 is available in pre-finished brown or black leather in sizes to fit waists from 28" to 50".

Model 132 Lined Belt is a smartly styled and beautifully detailed dress belt that's fully lined with an S&W blue suede synthetic. Crafted from Smith & Wesson's pre-finished brown leather, Model 132 matches the new Slimline and Sportsman holsters. It's 1¾" wide, really keeps a holster snug against the body. And it's available in a full range of waist sizes.

BELTS

ACCESSORIES

Model 97, the Rifle Cartridge Case is molded from thick, top grain cowhide. It will accommodate an insert with 20 rounds of your favorite cartridges. Thick belt loops are riveted to the body of the case for extra strength and durability. Model 97 is available in plain russet.

Model 133, the Double Clip Pouch, has been specially designed for use with the Model 27 Sportsman Auto Holster. Ruggedly fashioned from our pre-finished brown leather, the Model 133 accommodates S&W Model 39 or Browning 9mm clips.

Model 134 Double Clip Pouch, identical to the Model 133, is designed to accommodate Colt 45 clips.

Model 137 Cartridge Carrier, a perfect companion to the new Slimline holster and dress belt, is available in S&W pre-finished brown or black leather. The snap-on Model 137 holds six .38 or .357 Magnum rounds.

Model 138 Cartridge Carrier holds 12 rounds of .38, .357 Magnum or .44 Magnum ammunition. A raised loop design, the Model 138 is constructed so the belt passes completely through the entire length of the carrier body to insure a snug, wobble-free fit. It will take up to a 1 3/4" belt and is available in pre-finished brown only.

Model 90, the Rifle Sling, is ruggedly styled for rough duty. It's a military-type, one inch wide design with solid brass hooks. The Model 90 is available in russet finished leather, plain or basket weave.

Model 91, our Carrying Strap, has become a favorite in the field. It's fully lined for extra strength and comfort, with the rough side inward to provide a non-slip surface. Model 91 tapers from 2" to 1" in width and is available in plain or basket weave russet finished leather.

BUCKLES

In response to continued consumer demand for additions to this popular line, Smith & Wesson has created two new commemorative belt buckles.

Model 670/671, the Pistol Case, is a faithful reproduction of the top of one of the earliest Smith & Wesson presentation cases. The presentation cases, originally introduced in 1858, were molded from gutta percha, and featured the Model 1 First Issue in relief. Die struck in solid brass, the Pistol Case buckle is available in brass (Model 670) or antique silver (Model 671) finish.

Model 675, "The Horse Thief," is another in the series of buckles featuring turn-of-the-century paintings by Dan Smith. Smith uniquely captures the history and the spirit of the American west in his paintings. "The Horse Thief," one of a series of water colors commissioned by Smith & Wesson, is flawlessly re-created in this die-struck, solid brass buckle.

Model 600, "The Hostiles," is the original commemorative S&W buckle. It's an authentic, die-struck reproduction of the most famous of Dan Smith's western paintings in which a cowboy is pursued across a river by hostile Indians. The buckle is solid brass with a bronze finish.

Model 630, "The Last Cartridge," is the second in the series of buckles inspired by the paintings of Dan Smith. The Model 630 is a solid brass, die-struck replica of Smith's depiction of a life and death struggle with a bear.

Model 660, "The Symbol of Quality," features the official Smith & Wesson trademark and seal. The fine intaglio treatment of the intertwined S and W is enhanced by the antique surface finish of this die-struck, solid brass buckle.

Model 665, "The Magnum," was created to commemorate the 45th anniversary of the .357 Magnum revolver, a custom built gun that was the forerunner of a family of firearms that have gained unmatched popularity. Model 665 is a dramatic, end-on view of the cylinder struck in solid brass with an antique silver finish.

WESSONHIDE

The rising cost of top quality leather hides has created a demand for a less expensive alternative. Smith & Wesson has met this demand with Wessonhide™, a unique, tough, durable, synthetic material that's maintenance-free, requires no oiling, dyeing or drying. Impervious to heat, cold or moisture, Wessonhide has the look and feel of real leather and is ideal for use in adverse environmental conditions.

Model 19, the Pioneer Holster, is made to the same pattern as the popular Blazer model. Stitched with wear resistant Dacron polyester thread, the Wessonhide Pioneer holster has a full leather welt that gives it the smell of real leather. Its snap-on loop fits belts up to 3" wide. There's a Pioneer holster for virtually every popular handgun on the market today in barrel lengths from 2" to 8 3/8". And the Model 19 is available in your choice of russet or black.

Model 100, the Pioneer Dress Belt, is a fully lined, smartly detailed belt that tapers from 2" to 1 3/4" at the end opposite the buckle. It's available in either russet or black to fit waists from 28" to 50" in size.

Model 143, the Pioneer Cartridge Belt, is a rugged, handsomely styled companion for the Model 19 Pioneer holster. Fully lined, the Model 143 tapers from 2" to 1 3/4" at the end opposite the buckle and has 20 loops for .22, .38, .357 Magnum, .44 Magnum or .45 caliber cartridges. The Pioneer Cartridge Belt is available in russet or black in a full range of sizes.

Model 144, the Cobra Strap, is the popularly styled and detailed rifle carrying strap in rugged Wessonhide. A full, suede-like lining provides a positive non-slip surface for carrying comfort. Model 144 is available in russet finish.

Model 145, the Rifle Sling, is a tough, durable 1" wide sling that will look good on any gun. Its simple design makes two-position adjustment easy. The Model 145 is available in russet finish.

Model 146, Rifle Cartridge Case, is a good looking, ruggedly stitched case with a double snap flap. It will accommodate 20 rounds of your favorite cartridges and is available in russet finish.

You know when a knife is just right for you. You feel it in the easy, comfortable fit of handle to hand, the perfect combination of balance and weight and the shape of a perfectly ground blade.

Smith & Wesson knives have been designed and are made by people who know the qualities that make a good working blade. People who think of a knife the way you do, as a life-long hunting companion.

We carefully select specific heats of 440 stainless steels for our blades. Each blade is flat ground to achieve a perfect symmetry of surfaces and grind lines, the same way knives are made for "professionals" like chefs and meat cutters. The final edge on each knife is individually ground, tested and inspected to insure the exact angle and sharpness you demand.

You'll find the style you want in our broad line. Fixed blades, folding hunters and innovative pocket knives. Each is made with exacting skill and craftsmanship to provide the utmost in quality, performance and value.

And each is made in Smith & Wesson's own knife factory. With pride that you'll share when your choice is Smith & Wesson.

KNIVES

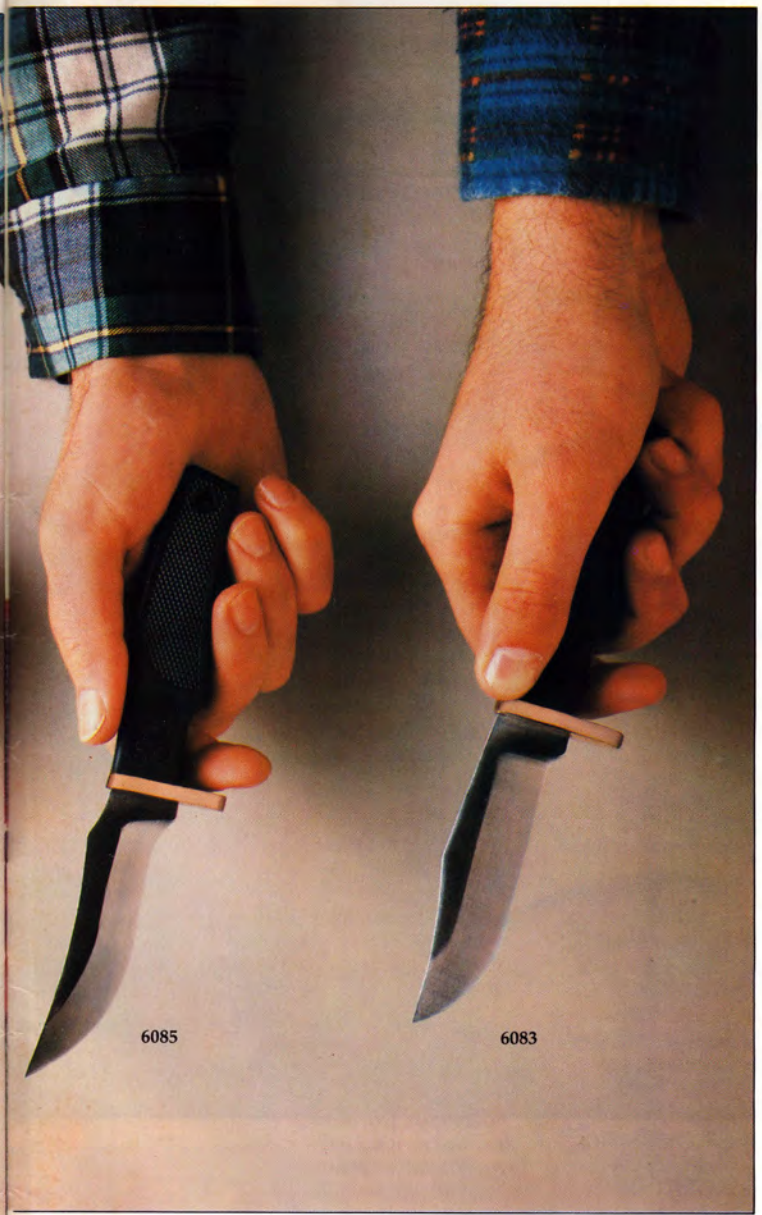
FIXED BLADE KNIVES

THE AMERICAN SERIES FIXED BLADE HUNTERS

You're in for a new sensation when you pick up one of the new American Series hunting knives. They're named after the famed Smith & Wesson Model 3 American, the first large frame, single action, top break .44 revolver. And they share the pioneering heritage of a gun that helped tame the wild American West.

You've never felt a knife like this before. The new "Posi-Grip" handle gives you a comfortable, sure, slip-proof grip no matter what the weather. And there's a lanyard hole for a wrist strap to provide added security.

These are real working knives. The shape of the "Posi-Grip" handle gives you perfect control whether you're working with the blade up or the blade down.



The "Posi-Grip" handle is going to stay in place for a lifetime, too. The specially formulated rubber of the "Posi-Grip" handle is molded on to the one-piece blade and tang and locked in place through strategically positioned holes in the tang.

Blades are 440 stainless steel, shaped for maximum strength and flat ground to the razor sharp edge you want and need.

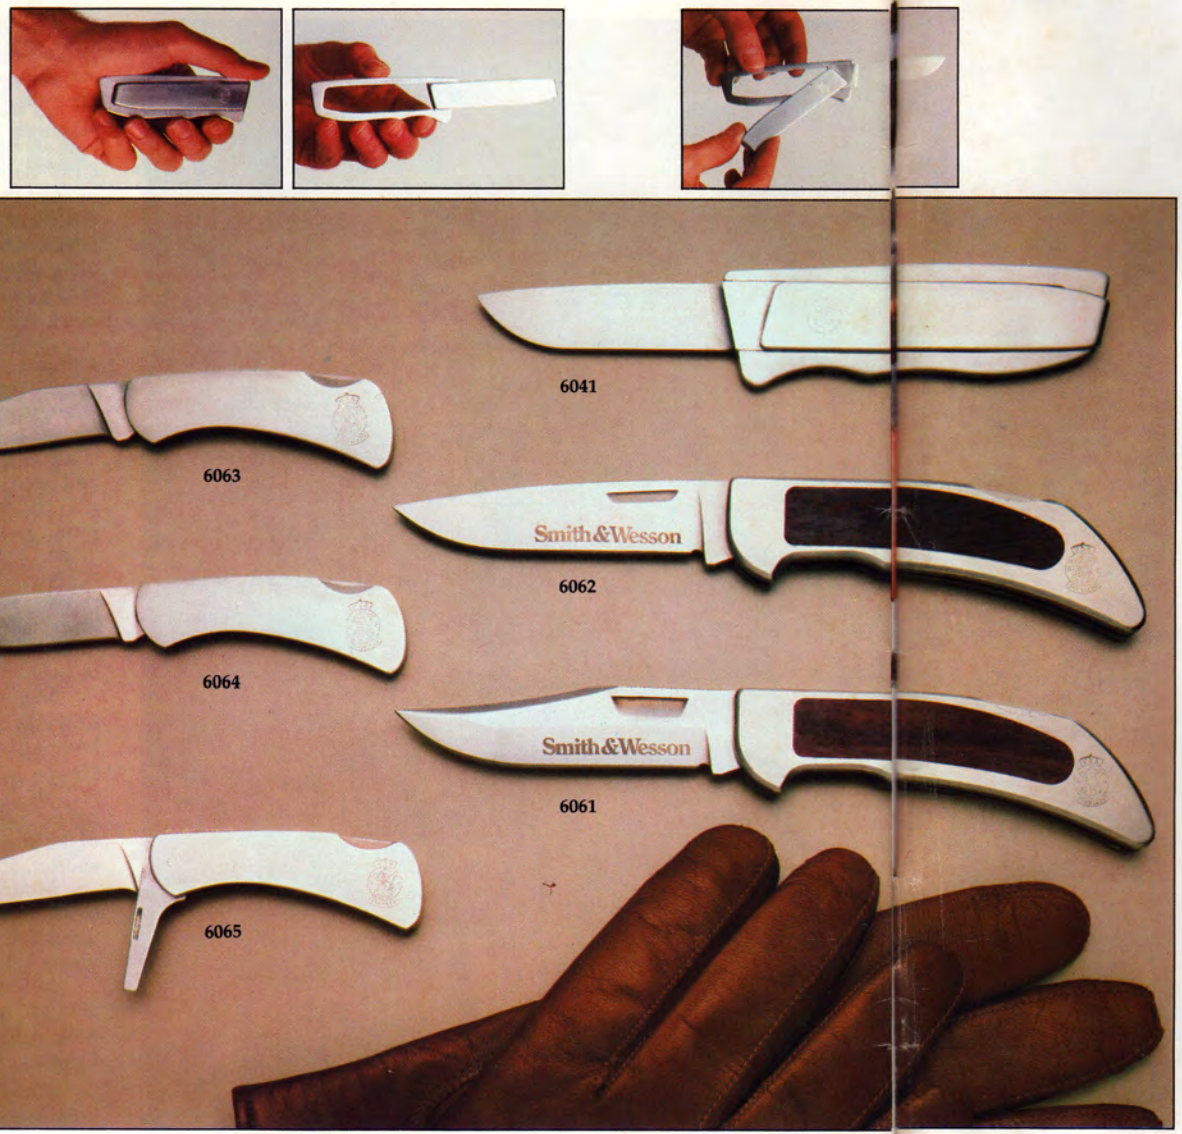
The fixed blade hunting knives with "Posi-Grip" handles are offered in four popular blade styles. Each comes with a durable, Wessonhide belt sheath.

Model 6080 is a heavy duty hunting knife with a $4^{3}/_{4}$" blade.

Model 6083 is a lighter duty member of the line with a shorter, $3^{3}/_{4}$" blade.

Model 6084 has a large "upsweep" configuration in a blade that is $4^{7}/_{8}$" long.

Model 6085 is a shorter "upsweep" knife with a $3^{3}/_{4}$" blade.



FOLDING KNIVES

ULTRA-THIN SPORTSMAN'S KNIVES

Smith & Wesson's Ultra-Thin combines the functional design of a lock-back sporting knife with the convenience of a pocket knife. Made entirely of stainless steel, these good looking knives are only 1/4" thick and a mere 3" long when closed. And they're contoured to protect your pockets. Open there's 2 1/8" of razor sharp, 440 stainless blade that makes the Ultra-Thin one of the most versatile as well as beautiful knives on the market.

Model 6063 Ultra-Thin has a clip point blade.

Model 6064 Ultra-Thin has a drop point blade.

THE SHOOTER'S KNIFE

We designed this totally stainless steel knife for the handgunner. In addition to the smart styling and lock back blade design it shares with S&W's Ultra-Thin knives, the Shooter's Knife has a screwdriver blade that's just the right size for adjusting sights. (Or the screws on fishing reels.)

Model 6065 Shooter's Knife has a clip point blade.

THE SWINGBLADE SPORTER

An innovative new Smith & Wesson design, the new Swingblade Sporter is a rare example of utilitarian beauty. It's entirely stainless in construction to provide the ultimate in strength and corrosion resistance for years of pleasure and service. The 3" blade, flat ground from 440 stainless steel, provides plenty of razor sharp cutting edge. The shroud securely locks the blade in the open position as well as enclosing and protecting the blade when closed. Weighing in at a mere 4 ounces, the Swingblade Sporter is only 5/16" thick and 4 3/4" long when closed, ideal for hunting, backpacking or camping. It's furnished with a Wessonhide pocket sheath and an optional belt sheath is also available.

Model 6041 Swingblade Sporter

MAVERICK FOLDING HUNTERS

There's a rare combination of durability and ruggedly handsome styling in Maverick folding hunters. Crafted from corrosion-resistant stainless steel, the Mavericks have a recessed lock release and a brass stop that prevents overtravel and blade damage. A notched tang provides a positive secure lock for the open blade. And genuine rosewood inlays highlight a hand filling handle that's contoured for a sure, firm grip. The 3 1/2" blades are flat ground from 440 stainless steel for strength and the ability to hold their razor sharp edge. A rugged, snap flap Wessonhide sheath is provided with each knife.

Model 6061 Maverick has a clip point blade.

Model 6062 Maverick has a drop point blade.
